HAPPY 4TH OF JULY

Celebrating 250 Years of Red, White and Blue

EXECUTIVE DIRECTOR *Corner*

Happy July, everyone! It's been an amazing summer so far of cookouts, nights spent with friends,

and of course, refreshing Happy Hours to help us cool down. In our childhoods, it was around this time of year that many of us started looking towards the dreaded return to the classroom – but here at our campus, the middle of July means that the party is just getting started.

As we head deeper into the season, there's still

plenty to look forward to around campus. From live entertainment and themed events to afternoons spent outside enjoying the sunshine, summer always has a way of bringing people together. It's been wonderful seeing everyone catching up with neighbors, welcoming visiting family members, and making the most of these longer days. We hope you'll continue joining us for all the fun, laughter, and little moments that make this time of year so special.

Have a great month!

Yours in Service,
Lindsay Morse
Executive Director

PROTECTING YOUR SKIN DURING UV SAFETY MONTH

July is UV Safety Month—a great time to raise awareness about sun safety and take steps to protect your skin, especially as you get older. As we age, our skin can become more delicate and susceptible to the harmful effects of ultraviolet (UV) radiation, which can increase the risk of sunburn, skin cancer, and other health concerns.

The good news? A few mindful habits can help you enjoy the sunshine safely while keeping your skin healthy and strong.

TIPS TO STAY SAFE IN THE SUN:

Use Sunscreen Daily: Choose a broad-spectrum sunscreen with an SPF of at least 30, and apply it generously to all exposed skin. Reapply every two hours,

or more often if you're swimming or sweating. Even on cloudy days, UV rays can still reach your skin.

Wear Protective Clothing: Light, long-sleeved shirts, wide-brimmed hats, and sunglasses that block 99–100% of UV rays offer great protection. Clothing made with built-in SPF is also a smart option, especially for long outings.

Seek Shade: Try to avoid direct sun exposure during the midday hours—between 10 a.m. and 4 p.m.—when UV rays are at their strongest. Plan walks or outdoor visits in the morning or late afternoon.

Stay Hydrated: Drink plenty of water throughout the day, especially in the heat. If you're on a fluid-restricted diet, check with your doctor about how

much you should drink. Skip overly sugary or alcoholic beverages, which can dehydrate you more quickly.

Check the Forecast: Stay informed by checking your local weather for extreme heat warnings and UV index levels.

Talk to Your Doctor: If you're unsure about how much sun is safe for you, or if you have a history of skin issues, ask your doctor for personalized advice. It's also a good idea to schedule regular skin checks to spot any concerns early.

Protecting your skin is one of the best things you can do for your long-term health. Small changes—like wearing a hat or keeping sunscreen in your bag—can make a big difference.

Let this season be a time to safely celebrate sunshine!

STAFF SPOTLIGHTS

Ben Gibbs, Our Director of Food Services. He has 20 years of experience of professionally working in kitchens. He graduated from Secchia Culinary Institute and WMU. He enjoys anything outdoors like camping, going to the beach, and working in the yard. He living in Plainwell with his wife, daughter and his dog.
