EXECUTIVE DIRECTOR *Corner*

Happy July, everyone!

It's been an amazing summer so far of cookouts, nights spent with friends, and of course, refreshing Happy Hours to help us cool down. In our childhoods, it was around this time of year that many of us started looking towards the dreaded return to the classroom – but here at our campus, the middle of July means that the party is just getting started.

As we head deeper into the season, there's still plenty to look forward to around campus. From live entertainment and themed

events to afternoons spent outside enjoying the sunshine, summer always has a way of bringing people together. It's been wonderful seeing everyone catching up with neighbors, welcoming visiting family members, and making the most of these longer days. We hope you'll continue joining us for all the fun, laughter, and little moments that make this time of year so special.

Have a great month!

Yours in service,

Kelly Duhaime

Executive Director

ACTIVITY PHOTO HIGHLIGHT

PROTECTING YOUR SKIN DURING UV SAFETY MONTH

July is UV Safety Month—a great time to raise awareness about sun safety and take steps to protect your skin, especially as you get older. As we age, our skin can become more delicate and susceptible to the harmful effects of ultraviolet (UV) radiation, which can increase the risk of sunburn, skin cancer, and other health concerns.

The good news? A few mindful habits can help you enjoy the sunshine safely while keeping your skin healthy and strong.

Tips to Stay Safe in the Sun:

- **Use Sunscreen Daily:** Choose a broad-spectrum sunscreen with an SPF of at least 30, and apply it generously to all exposed skin. Reapply every two hours, or more often if you're swimming or sweating. Even on cloudy days, UV rays can still reach your skin.
- **Wear Protective Clothing:** Light, long-sleeved shirts, wide-brimmed hats, and sunglasses that block 99–100% of UV rays offer great protection. Clothing made with built-in SPF is also a smart option, especially for long outings.
- **Seek Shade:** Try to avoid direct sun exposure during the midday hours—between 10 a.m. and 4 p.m.—when UV rays are at their strongest. Plan walks or outdoor visits in the morning or late afternoon.
- **Stay Hydrated:** Drink plenty of water throughout the day,

especially in the heat. If you're on a fluid-restricted diet, check with your doctor about how much you should drink. Skip overly sugary or alcoholic beverages, which can dehydrate you more quickly.

- **Check the Forecast:** Stay informed by checking your local weather for extreme heat warnings and UV index levels.
- **Talk to Your Doctor:** If you're unsure about how much sun is safe for you, or if you have a history of skin issues, ask your doctor for personalized advice. It's also a good idea to schedule regular skin checks to spot any concerns early.

Protecting your skin is one of the best things you can do for your long-term health. Small changes—like wearing a hat or keeping sunscreen in your bag—can make a big difference.

Let this season be a time to safely celebrate sunshine!

Happy Hour

Is every Friday 2:30–3:30 in the AL dining room and 3:30–4:30 in Legacy. Come join us for live music, light snacks and cold drinks.

From Our Kitchen to Yours

Chef Circle is every other Wednesday at 2:00. A member of the culinary team meets with residents to discuss past and present meal menus.

Out & About

The White Oak bus is always ready for action on Tuesdays and Thursdays for resident outings. See the monthly calendar for details.

Legacy News

Activities like these remind us that joy is often found in everyday moments. Preparing food together not only helps create a delicious dinner but also strengthens connections, encourages engagement, and fosters a sense of community. By the time dinner was served, residents could enjoy knowing they played an important role in making the meal special for everyone.
